Chapter 101 What He Must Confront

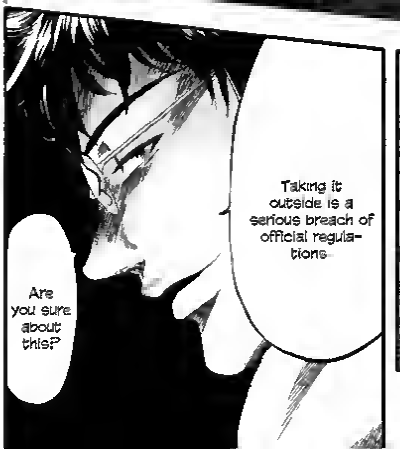
We hear the spy boat has been located

Might it not be wiser to let something that problematic rest at the bottom of the ocean forever?
Do you truly intend to raise it, Tachikawa?

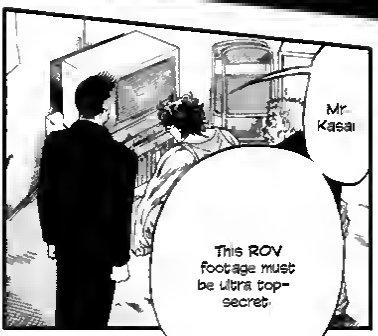
Besides, our neighboring countries will definitely try to get involved!
That "problematic" boat —
May turn out to be a "treasure ship" that will change our relations with our neighbors forever

Prime Minister Tachikawa.
Are you trying to predict this country's future?
3
Leaving their mark on history is the ultimate achievement of any politician
Well, just sit back and watch

Oho!
So this is what it's like inside...



Are you sure about this?
Taking it outside is a serious breach of official regulations.



Mr. Kasai
This ROV footage must be ultra top-secret.

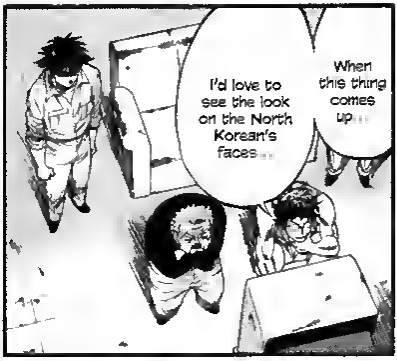
Hey, Boss!
Kasai here is risking his job to bring us this video
The least you could do is take a look
That's what you'd do if you had even a shred of a savior in you .

Impressive.
They even had PK machine guns and rocket launchers.
There are explosives all over the place...

I'm not going there!

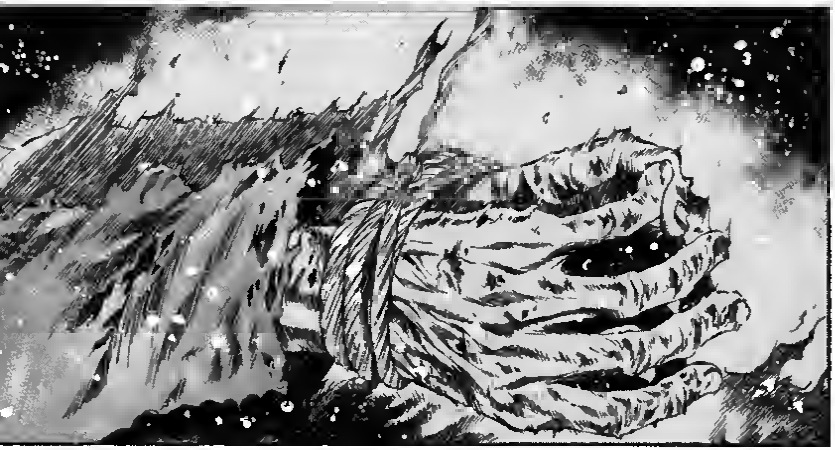
That boat can just stay down there forever!

I'm not going to get involved in this any further.



.....
We estimate their ages...
.....
To have been between 16 and 18.
These guys...

Did that to Kakihara?!
Kids that young...

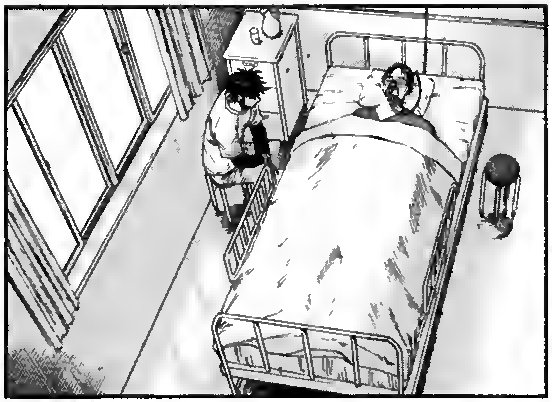


Their leader probably tied them up—
So they wouldn't try to run or ask us for help—.
Why?

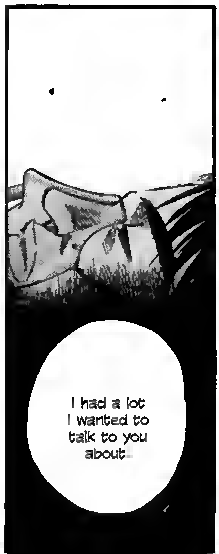
This...
This is inhuman!

But... this is reality!
We all value our lives
Those spies—all of us

They're victims too...
In order to prevent something this foolish from ever happening again...
We have no choice but to raise this evidence from the bottom of the sea!
And to do that...
We need your help!



14



I saw the guys that did this to you
Those guys....
They were even younger than us.

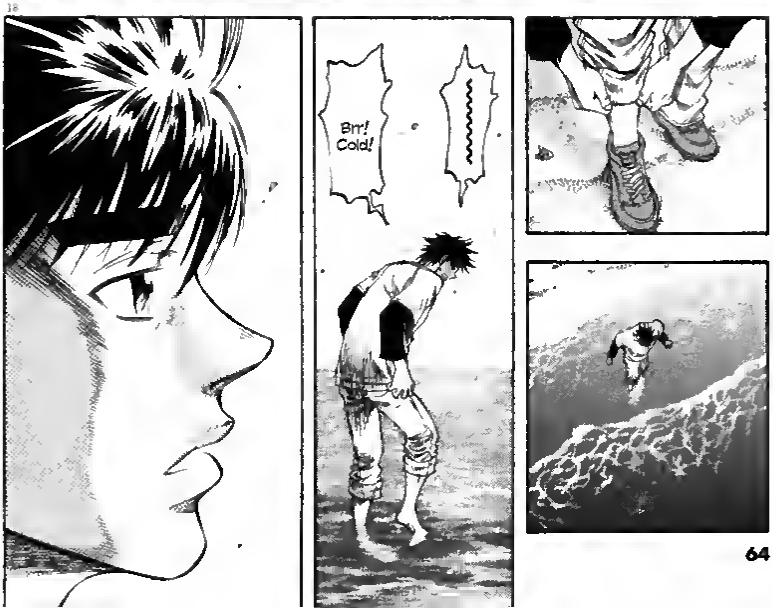
Or do anything ever again.
Will never walk...

#44
People have been killing each other at sea since the beginning of time
They have shed blood over different rights and various desires
And this wasn't just a fluke event

Since the dawn of history the sea has never been blue!
The true color of the sea isn't blue It's pure red the color of blood!

And in all that...
We can't avoid it or pass it by.
That's the relationship Japan...no, this world has with the sea.
Salvors are the only ones who [illegible] back [illegible] of [illegible] at sea...
To their loved ones and families.
I'm sorry!
Salvage is...
The final "hope."

They are the final hope.



Brr! Cold!

The sea is blue, isn't it?
Dad...

This is Nanba....
トルルル
トルルルル

The sea...
Please let us...
Raise that boat!
Is blue!
